

Programme: NPOO

Project ID: NPOO.C1.1.2.R2-IS.01.0170

Project value: 849.835,00€

Project Start Date: 01/01/2023

Project Duration: 24 months

Co-funded by
the European Union

MetaAge

Commercialization of the Biological Test for Metabolic Age

The MetaAge project focuses on the commercialization of a biological test designed to assess metabolic age. This innovative test is based on analyzing specific biomarkers to determine how the body's metabolism has aged compared to its chronological age. The project aims to bring this test to market, enabling individuals to gain valuable insights into their metabolic health and to take action in improving their overall well-being. By applying cutting-edge technologies in biological testing, the MetaAge test will provide an essential tool for preventive healthcare and personalized wellness. This initiative is supported by the "Commercialization of Innovations" call, aiming to foster the transfer of research innovations to real-world applications.
